IS CREATIVE CRAFTSMANSHIP

CREATIVE CRAFTSMANSHIP

Riverside Millwork

Industry leaders for over 25 years, Riverside Millwork's designers and craftsmen link passion and experience to deliver doors and windows of superior quality to our customers. Beginning with an idea and developing the unique concept, Riverside's creative woodworking will be seen every time you open your new door or look out your new windows.

#### CREATIVE CRAFTSMANSHIP.

##### **Mission Statement**

We will use our creative process, craftsmanship and quarter-century of industry experience to build the finest quality door and window.

##### **Vision**

Creativity is the process of working together with our customers to build something truly unique, something that says you. Creativity is knowing the finished product is special, one of a kind. Creativity is utilizing your imagination to make a door or window that will showcase your personality.

Craftsmanship is the art of building a special product to the highest standard. Craftsmanship is attention to detail. Craftsmanship is building with passion and genuine pride. Craftsmanship is appreciating that new door or window that will share in your memories of home.

When you combine creativity and craftsmanship you have the culture of Riverside Millwork. Our craftsmen are artists who take great pride in their creative approach to building high-quality products with longevity.

It is our customers who inspire our team of craftsmen to create your perfect door or window.

*We build with creative craftsmanship,*

## OUR STORY

Founded in 1988 and sustained by a reputation for striving to achieve 100 percent customer satisfaction, Riverside Millwork currently serves the East coast, with a high concentration in the mid-Atlantic and Southeastern sections of the United States. A majority of our creative craftsmanship experts have been with the company for over 20 years. A long standing relationships with our industry partners and valued customers has been a trade mark of Riverside Millwork.

# BUILDING UNIQUE DOORS

We hand select the wood for each door. The mahogany wood we use as a woodworking canvas is actually Sapele and it grows in our major Southern footprint. Walnut, ash, maple, fir, hickory, cherry, pine, red and white oak, knotty alder are all sourced domestically.

In our creative development process, it's not unusual for our talented people to pitch in and help develop your door, from first cut to the final touches. We may be old-fashioned in our hands-on approach; we are a modern facility and have invested in CNC and other high-tech equipment to provide precise manufacturing to design specifications.

Riverside makes products for interior and exterior use. Many of our light commercial contracts, like restaurants, wineries, club houses, executive offices, etc., use millwork from Riverside on all interior accents. This is true for new construction and remodeling projects, especially applicable to high-end custom homes.

## WHY A RIVERSIDE MILLWORK DOOR?

Constantly examining our work, all of Riverside's doors and products are hand-made on location. That ensures our level of quality is always met. Our creative difference is cut from a plan with no shortcuts. We treat all end grain of panels and stiles with preservatives to seal against moisture. Our door panels are ripped, jointed, and profiled to prevent splitting or warping over years of exposure to the elements. Our door stiles consist of end blocks and are edge-banded to give the appearance of a solid wood product. And all of our stiles are made of engineered stave cores to prevent warping. Our glazing techniques are above industry standards to eliminate failures in the field. It is the many little things we do that answer the question, Why Riverside Millwork.

RIVERSIDE DOORS ARE BUILT TO LAST A LIFETIME.

## WINDOWS AND TRIM

Through our craftsmanship, we want to help make your images of life more beautiful. Attention to fine detail is what makes our images come alive for you. We believe by putting in the extra-effort, our inspiration can, in a small way, change your view on the day.

Our custom trim is made to standard or custom profiles and has a seamless transition to match the wood of a custom door or window.

### **Creative Window Units**

Specialty Units to meet your needs  
Operating or fixed / Geometric and Radius

### **Creative Custom Trim**

Interior or Exterior  
Standard WM moulding patterns and sizes  
Custom patterns and sizes  
Any species to match your doors and windows

CREATIVE  
CRAFTSMANSHIP

Our creative craftsmanship can be seen at homes in many states. And there is a reason why strong American names like Donald Trump and Bob Timberlake used Riverside Millwork doors for their beautiful buildings and brand image. They want their name on the best and we try hard everyday to deliver the best.

Our dedication to delivering creative doors and windows and bringing a sense of art and glamour to your home

remains as fresh now as it did when we opened in 1988. Doors and windows say a lot about the people who live inside. Allow us the opportunity to help you make a personal – and lasting – statement on your home.

We hope that our culture of creative craftsmanship can help you enjoy your home as much as we enjoy building your beautiful doors and windows with creativity, style and artist passion.
